

Burning Rock Announces Changes to Management and Board of Directors

September 27, 2024

GUANGZHOU, China, Sept. 27, 2024 (GLOBE NEWSWIRE) -- Burning Rock Biotech Limited (NASDAQ: BNR) (the "Company" or "Burning Rock"), a company focused on the application of next generation sequencing (NGS) technology in the field of precision oncology, today announced the resignation of Mr. Leo Li as a director from the Company's board of directors (the "Board") and as the Company's chief financial officer, effective September 27, 2024.

Mr. Li has confirmed that his resignation was for personal reasons and not due to any disagreement with the Board, the Company or any of its affiliates on any matter relating to the Company's operations, policies or practices. Mr. Li further confirmed that he has no claims against the Company whatsoever, whether in respect of fees, remuneration or compensation for loss of office.

Concurrently, Ms. Xiaozhi Hu, senior director in finance of the Company, will be in charge of financial operations, financial reporting and related matters of the Company, and report directly to Mr. Yusheng Han, chairman of the board and chief executive officer of the Company. Ms. Hu joined the Company in May 2014 and has extensive experience in financial management.

Mr. Yusheng Han, chairman of the board and chief executive officer of the Company, stated, "On behalf of Burning Rock, I would like to express my sincere gratitude to Mr. Leo Li for his contribution to the Company during the tenure of his service, particularly during the process of Company's initial public offering and the subsequent business development projects. Leo has played a crucial role in enhancing Burning Rock's performance in the capital markets as we achieved significant milestones. We respect his decision and sincerely wish Leo continued success in all his future endeavors."

About Burning Rock

Burning Rock Biotech Limited (NASDAQ: BNR), whose mission is to guard life via science, focuses on the application of next generation sequencing (NGS) technology in the field of precision oncology. Its business consists of i) NGS-based therapy selection testing for late-stage cancer patients, and ii) cancer early detection, which has moved beyond proof-of-concept R&D into the clinical validation stage.
