"We appreciate existing and new shareholders' valuable support towards our IPO in June, the largest IPO by a molecular diagnostics company from China, as we look to leveraging the proceeds raised to catalyze our growth trajectory," said Yusheng Han, chairman and chief executive officer of Burning Rock. "Amid sporadic COVID incidents in China during the second quarter, we returned to positive year-over-year revenue growth. We continued our efforts to bring NGS testing capability in-house for hospitals through our decentralized, kit based, in-hospital channel; we also advanced our market leadership position in the central-laboratory channel where samples are sent out to third-party laboratories for testing. For early cancer detection, after four years of internal R&D, we launched the 14,000 patient PREDICT study during the second quarter, the first early detection study in multiple cancer types in China, to further develop and validate our blood-based test."

Second Quarter 2020 Financial Results

This reversed the 37% year-over-year decreasing trend during the first quarter. Number of patients tested in the central laboratory channel increased by 19.9% to 7,252 for the three months ended June 30, 2020 from 6,047 for the same period in 2019.

This reversed the 36% year-over-year decreasing trend during the first quarter. Number of contracted partner hospitals in the in-hospital channel increased to 24 as of June 30, 2020 from 21 as of March 31, 2020 and 19 as of December 31, 2019.
